

**Water
Whys**

Spring 2024

“Where does the water in the Colorado River come from?”

“What is a bathtub ring?” “Why is flooding more likely after a

Are you creative?

**Do you enjoy collaborating with diverse teams
from outside your major/department?**

Join the Spring 2024 “Water Whys” Vertically Integrated Project (VIP)
to translate pressing water questions to graphical answers designed for
the general public. Graphics produced will be used by broadcast
meteorologists on TV and social media.

We’re looking for **undergraduate** and **graduate** students with a range of interests including:

hydrology/atmospheric science/environmental science

science communication and education

graphic design/illustration/animation

VIP students receive **1 unit of research credit**. The group has a **mandatory virtual meeting**

Mondays from 10-11am and Fridays from 11am-noon.
